Professional Summary

DevOps Engineer with a solid foundation in software development and systems engineering, specializing in cloud infrastructure automation and CI/CD pipeline implementation. Currently working with AWS cloud services including ECS, EC2, S3, ECR, Bedrock, and Kendra, alongside Google Cloud Platform and cutting-edge development tools like Claude Code, Cursor IDE, and Gemini CLI.

Passionate about leveraging technology and automation to solve complex infrastructure challenges while always adapting to the newest technologies available. Strong programming background in Python and C, combined with hands-on embedded systems experience. Currently pursuing MSc in Cybersecurity and Privacy to integrate security-first principles into modern DevOps practices and eager to take on new challenges in cloud-native environments.

Experience

Fundcraft

DevOps Engineer

Girona, Spain

Feb. 2025 - Present

- Designed and deployed CI/CD pipelines using GitHub Actions with automated testing and deployment strategies
- Provisioned AWS and Google Cloud infrastructure using Terraform, integrating services like Bedrock, Kendra, and Vertex AI
- Configured Datadog monitoring with custom dashboards and alerting systems for proactive issue detection
- Automated configuration management using Ansible and n8n workflows for enhanced automation
- Implemented internal Docker tooling for streamlined development workflows across the company
- Collaborate with development teams using Cursor IDE and modern tools to optimize application deployment workflows and enhance system reliability
- Troubleshoot production issues and implement solutions to improve system performance and uptime

SALICRU S.A.

Embedded Systems Engineer

Santa Maria de Palautordera, Barcelona

Sep. 2023 - Feb. 2025

- Developed automated testing frameworks for microcontroller firmware validation
- Built reusable communication libraries for various hardware protocols
- Implemented debugging and monitoring tools for embedded system diagnostics
- Created firmware for microcontrollers using C, focusing on performance optimization and reliability

SALICRU S.A.

Software Engineer

Santa Maria de Palautordera, Barcelona

Feb. 2022 - Jul. 2023

- Developed a desktop application with Python-based graphical interface for automatic code generation
- Created intuitive GUI using PySide2/PyQt frameworks with database integration
- Implemented template-based code generation to streamline embedded systems development
- Designed relational database schema for storing code templates and project configurations

Technical Skills

AI Development Tools: Claude Code, Cursor IDE, Gemini CLI, Anthropic API, n8n

AI Cloud Platforms: AWS Bedrock, AWS Kendra, Google Vertex AI

Cloud Platforms & Services: **AWS:** EC2, ECS, ECR, S3, CloudWatch, IAM, VPC, Bedrock, Kendra

Google Cloud: Cloud Run Jobs, Cloud Storage, Compute Engine, Vertex AI

Multi-Cloud: Oracle Cloud, DigitalOcean, Linode, Hetzner

DevOps & CI/CD: **CI/CD:** GitHub Actions, GitLab CI

Containerization: Docker, Docker Compose

Infrastructure as Code: Terraform, Ansible

Monitoring: Datadog, Grafana, Prometheus, CloudWatch

Programming & Scripting: **Primary:** Python, Bash, C

Secondary: JavaScript, Java, PHP, Lua

Markup & Config: YAML, JSON, HTML, CSS

Version Control & Tools: Git, GitHub, GitLab, Subversion (SVN), JIRA, NVim

Operating Systems: Ubuntu, Debian, Alpine, Windows, Kali Linux, Raspbian

Development Frameworks: Django, FastAPI, NextJS, Flask, PySide2, PyQt, Qt, Bootstrap, Drupal CMS

Databases: MongoDB, MySQL, PostgreSQL, Redis, Vector Databases

Certifications & Professional Development

In Progress: AWS Certified Solutions Architect - Associate (Currently studying)

Education

Universitat Oberta de Catalunya

Barcelona, Spain

Master of Science in Cybersecurity & Privacy

Sep. 2024 - Present

- **Focus Areas:** Security infrastructure, penetration testing, digital forensics, security auditing
- **Relevant Coursework:** Cloud Security Architecture, DevSecOps, Incident Response, Risk Management
- **Applied Learning:** Integrating cybersecurity principles into DevOps practices and CI/CD pipelines

Universitat de Girona

Girona, Spain

Bachelor of Science in Computer Engineering, ICT Specialization

Sep. 2017 - Sep. 2023

- **Relevant Coursework:** Software Engineering, Network Administration, Database Systems, Operating Systems
- **Final Project:** Template-based code generation tool for multiple microcontrollers
- **Technical Focus:** Information and Communication Technologies with emphasis on systems integration
